Chelan County Wa State: Egregious 911 Abuse and Cover Up

Ryan Hell <ryanbrooklyn2020@gmail.com>

Thu, Aug 14, 2025 at 4:06 PM

To: <hotline@fcc.gov>

My name is Ryan Hell. My DoB is 01-09-1978.

I live in Seattle Washington.

I am writing to inform you and desperately seek some injunction to stop the false prosecution of me, in light of a mountain of evidence of operational misconduct and malfeasance which namely, as it were;
A CRIMINAL SCHEME TO KIDNAP AND MURDER ME DURING AN EMERGENCY CALL FOR URGENT LIFE SAVING MEDICAL ASSISTANCE.

I WAS KIDNAPPED BY CORUPT DISPATCHERS ON JULY 4th 2024 in Chelan County Wa State. They denied ambulance offered personal ride then OPERATION MANAGER took us to his personal home and had me assaulted and demanded 1000 dollars cash for a non existant and unauthorized tow or repair of my truck; then later as seen in their video evidence they demanded 1000 themselves saying" this is for us. For saving your life"

Massive cover up. They are attempting to railroad me thru court with corrupt public defense and judges to disappear and silence me..,

IMMEDIATE EMERGENCY FEDERAL ASSISTANCE NEEDED

This occurred on July 4th 2024. The location was Malaga Wa, in Chelan County, the center part of Washington State.

Overview of Incident:

a friend and I had planned for some time to go camping with her dogs. As July 4th settled closer, we opted for a trip on that day, and packed our gear and took off in my 2007 F150 pickup. Fully licensed and current tabs and tags, as well as a fishing license and state park pass. We drove to Wenatchee then up into the overlooking bluffs as I wanted to get photos of a solar event and I did so. The following day it was decided to see if this remote park complex, largely known locally as the Colockum Wildlife Park. There was a Wa State Discovery welcome board at the entrance which stated some basic rules which we carefully examined and agreed we were in full compliance with. Dogs were allowed. So was overnight up to three nights. Rules said obvious things like Don't litter no fires/fireworks. Got it and totally ok with it. We even left our cook gear as storage to avoid any misunderstanding if they should stop or there was a fire in an area we went to.

July 4th

We used Google maps to route home now. Maps provided a passage route through and beyond which would bring us close to or onto Blewitt Pass, with which we could get back to Seattle.

Sometime during the early day my passenger, a disabled elderly woman named Gina Hrpcha; who has serious diabetic issues I now know/... informs me she forgot her insulin. We are inside this park network with no cell service.

Maps was wrong. In fact it is a well known issue among locals according to many locals yet the issue remained and it caught us totally off guard.

With the flat tire spare, I nursed my truck at a slow pace, desperately attempting to get this poor woman to services in order to get her to help, as her condition degraded quickly as the heat was severe and we had exhausted all water and food now. She was falling asleep

We continued as though it went through not yet aware it was dead ended. Upon being forced to stop I realize I had a flat tire.

My spare is also flat, I discover. I put the spare on though, since tire seemed fine and likely broke bead on a deep rut on this rough gravel off road.

My passenger is well into diabetic shock or insulin coma now, and only intermittently wakes up. I am frantically screaming to wake her up. I get about 20 miles; I estimate to within about 4 miles of paved roads... and I am completely stuck. The physical exertion involved in the ordeal thus far was dramatic and I suspect I had a mild stroke, as I have in the past., I realize as it is July 4th I am dealing with a urgent matter and must get help before its too late for us.

I called 911 and was greeted on phone with rude WHAT DO YOU WANT RYAN?. I was dumbfounded. I explain the emergency and express urgency and the dispatcher callously says "oh well, youre on your own". She argues with me for approximately 1/2 hour until I BEG her not to let this woman die; I said I know they are after me for political reasons but the woman is no part of it/ She has kids and grandkids, people will be devastated. I begged them, to rescue her if anything/

Eventually the dispatcher says she will make some calls. She ask me first "what year is your truck and is it paid for?" I immediately recognized the mechanisms of a highway robbery type coercion towards road service and I notified her VERY CLEAR; I DO NOT NEED A MECHANIC I DO NOT NEED A TOW! I NEED AN AMBULANCE!!!! MAM PLEASE

The dispatcher then said "well I dont have an ambulance but I can get your truck towed and you guys will be closer to a hospital;". I said this is ludicrous. She said take it or leave it. Essentially.

I flatly insisted NOBODY is working on my truck. It just needs air in the tire She went back and forth a half dozen times wasting more precious time, exhausting me then finally agreed that she heard me and repeated that she understood that I did not consent to any work or tow of my truck. She then said she had a city councilman and a orchards employee who could come pick us up.

The promise was to drive us to a personal residence where a ambulance would wait for us.

ANOTHER hour goes by and a GMC pickup pulls up man and woman inside. We are grateful to be picked up and offered water/ Keep in mind this is a one way VERY REMOTE and VERY isolated gravel road. We didnt see anyone other than the park workers/

These two people drive us up the gravel; to main road. During the trip I asked politely WHO they are. They ignored me causing me some concern

The female takes a call and I hear her mentioning us to someone on the phone. I quietly asked the male who she was talking to, hoping it was the ambulance. He said it was her work...that she was a DISPATCHER. He claimed he was a fireman. Later he admitted he was a DISPATCHER also. And later yet I discovered on my OWN; Jeremiah Johnson IS in fact, the **OPERATIONS CENTER MANAGER at RIVERCOM 911 A PSAP located in Chelan County Washington state and servicing as he exclusive 911 center for Chelan and Douglas counties in our state; a large territory.**

(Rivercom as I learned; is a private PSAP municipality. Supposedly or boarded / chaired by politicians and or justices etc. They keep that hidden though)

At the house they take us to I see right away there is no service on my phone nor my passengers. THIS CONCERNS ME gravely. I see multiple people there freely using their cell phones and suspect foul play with radio interference. Given what I since learned about Jeremiah Johnson's career I can see a strong likelihood he jammed our phones.

While there a woman was introduced, oddly three separate times; as Jeremiah Johnson's MOTHER. I knew it was unlikely but kept it secret, as my distrust for this rescue has ballooned to sheer panic.

At NO TIME did anyone take my passengers vitals or assess her in any way, not even the slightest. This was another massive red flag.

I asked again and again periodically; where is the ambulance and they never had the same answer just kept lying said it was on the way, they arent sure, it got lost etc etc.

Approximately one hour into this Jeremiah ask me to go outside so I follow him. There in the long gravel driveway of

this very isolated, essentially desert canyon home; is my pickup with an unknown man driving it. Behind my truck still coming down the road a way backl was a RED tow truck which carried an ATV.

image.png

The Red Tow truck stopped and I immediately filmed to ensure they did not lie and claim they TOWED my truck. I captured photos of the atv on back and they quickly tried to unload it while others pulled the red hummer fire truck to obscure my field of view I suspect. At any rate I was faster. And they are not claiming to have towed my vehicle best I know. (FYI the red hummer was utilized fraudulently also I suspect. It is a first gen military type, and has normal civilian plates. I was informed its merely a parade truck. Yet they deployed it for effect by driving it up in front of me with the RED ONLY overhead light light bar flashing. Then multiple people adjopined wearing what I immeidately recognized as a knockoff city employee uniforms. In the case of Webnatchee its long been known that scammers will utilize "Wenatchee" shirts with a apple silhouette and it is incredibly similar to official CITY OF WENATCHEE attire the officials wear except it does not say "CITY of.." it just says Wenatchee". In the video evidence I am heard adrressinf this.

What ocured in fact; without my knowledge or permission and totally against my explicit and repeated DIRECTIVES: THEY STOLE MY VEHICLE.

Jeremiah had apparently communicated with Jerewmiah Johnson to determine year and make then secretly drove to my truck after we were picked up and off waiting for the ambulance.

This man demanded 1000 dollars an even number. I know the state law requiores tow operators to register their fees with our state capitol each year. And the idea he randmkly hiut 1000 dollars is ABSURD. I first said THANK YOU. Sincerely. My hope is to get my injured passenger into my rig, abnd quietly get the hell down the road from this corrupt circus before they freak out and murder us, because i am WELL aware of every. single con they are playing. I worked as a commercial construction super in the northjeats NY, JErsey, Delaware, MAryland and Florida. I dealt with 100's of corrupt inspectors who put their greedy hands out and did all sorts o\f shameful crap to try to make an extra buck. I seen this all well away and played it cool, acted like i was a fool hoping to pay and leave then contest with visa later.

The tow man said no cards allowed. CASH ONLY which illegal in our state. I then thought of a clever way to send a signal for sos to loved ones; I requested access to a phone to call nearby family who would bring cash. Then for no reason they very flatly refused that as well. At that point i was in grave grave danger. They took my truck and wouldnt take payment.

I then requested documentation or some sort of invoice. They smiled and said there isn't one nor will there be. This isn't an impound we are TAKING your truck. I was genuinely confused. I am face to face at this time and being serious and polite and gracious; these men are denying me means to make payment and my passenger at this time has now been away out of site over an hour while they shake. e down. I am desperately concerned for her and aware she is also in danger should they attack me to murder me.

I decide to tell them I have family waiting for us down the road. This lie is one major reason I lived to escape these events that day. During this phase I informed them that I am aware of this being an illegal operation. They yelled at me and called me names. I stated that they have clearly interfered with a duress call via 911. That they stole my truck. They likely will face kidnap and extortion charges. They laughed and said I wont live to tell about it. I screamed for Gina my passenger she couldnt hear me I guess but I thought she was dead. I am standing there and Jeremiahhs wife Jena runs over and punches me in the face with a closed fist. Out of nowjhere., Almsit knocks me out. I stumble and knew IMMEDIATELY it was a setup to shoot me and kill me them claim self defense. The tow driver throws my keys down then says he is done/

Jeremuah quickly snatched my keys and says i aint giving your truck backbag now get off my property before I shoot your ass. I see his hand in his back; I beg for my passenger, plead for these people to calm down. Female is laughing at me spits on me. Jeeremiah keeps the threats saying leave now. They telll me the passenger is with them now. I asked them to PLEAE get her so I can verify she is ok and wants me to leave. They REFUSE to!

I immediately see a sketchy situatio where I could be pinned with her murder if i. leave her there and go alone. I STATE thatand I stay./ They call 911 report that I made threats to leave get a gun come bacI, some type of feloy threats.

During the 45 minutes or so it tool deputi4s to arrive; I hear a woman yell "WHERE IS RYAN?! I CANT :LET RYAN SEE ME". Nobnody know me there or anywhere. I dont have any enemies I know of...well corrupt poloticiasn I exposed in 2017...YES. But I ran to see WHO she was. With 1% battery on my phone i ready it...and I snap about a dozen photos of the woman fleeing.,. they told her again. "HURRY, you have to go the sherifs deputies wont come on the property while you are on it".

This woman was 20 YEAR veteran CHIEF prosecutor in Seattle / King County, her name is Sally Bagshaw. She was most recently City Councilwoman in 2017 when I heloed the seattle times investigators uncover former Seattle Mayor Ed Murrays cps scandal where a custody CPS judge found gold in 1984 for murray molesting his own foster son. This apparently angered powerful people because my innocent wife at the time, Jacika Akter, who was a TSO wiuth TSA at Seatac; was robbed at gun point and chased into the hiway and nearly hit by bus. The police ated amused about that and the incident prompted our move to philadelphia and nyc. Where nothing like these thiungs happened untiul I moved home a few years ago.... and the gand stalking all started over. Ive been assailed multiuple times nearly murdered many times. I plan on leaving after this.

The arrest was excessive and violent and WILD. They staged a shooting making me move a lot while yelling threats at me and saying "put tstown the gun!" and "he has a gun"... that sort of dialogue wwnr on for 20 minutes or so. I had nothing in my hands, beggerf for my life. They listened when i claimed they were being setup to kill a political target and they would be sold out and arrested for it.

The county took almost a YEAR to let me see video evidence. Its all been HEAVILY doctored. You can see the video anomalies that indicate they alrtewered it. Its likelu easy to see. Thjey also bulldozed a MOTION I presented A PROPER MOTION, to PRESERVE FORENSICS evidence. The prosecutor had nearly fallen out of his chair when he seen it, he aske me directkly to with draw it. I siad sorry. They continued for two weeks then dismissed the motion after basicalluy RAILROADING my merits which were sound.

I have an evidence site up at www.ryanhellfiles.com

Be aware the PSAP Rivercom is privately owned and they are terrified of accountability. ALSOL: please be aware these people have LIKELY been engaged in similar activity and have cold cases mounting which my case will expose.

MY LIFE IS IN IMMEDIATE DANGER
