Ethics concern

In this lengthy article I am struggling to use my phone on my way to turn myself in, in Chelan for a warrant issued after a couple court dates were issued and I wasn't notified and had no means to obtain those dates myself. This court and primarily jurisdiction have become grave concern regarding me getting a fair trial. I am presenting evidence of a conflict of interest, ethics violations, as well as prosecutorial misconduct and probably a larger conspiracy to commit murder. I've already reported the matter to the Burroughs of Justice and I'll continue to red flag until I feel safe. I ask you to carefully consider these facts with a non emotional point of view leaving opinions at the door. I don't expect everyone likes my views, I just don't expect my government to stalk and murder me and a passenger on the Fourth of July for them. Secodmary Conflict of Interest / Ethics Concern "Barber" There was a woman at the seen who was introduced to me and her name I am not quite sure but I IMMEDIATELY recognized her in my first court date as the Stenographer. I attempted to tell my lawyer he urged me not to. Let's call her Barbara for clarity, since I couldn't get her formal name. MOST CONCERNING AND WHY I AM WRITING A KING COUNTY SENIOR LEVEL PROSECUTOR aND established SEATTLE CITY COUNCIL WOMAN , whom I have made the misfortune of of become a political target OF; SALLY BAGSHAW Has direct involvement in this case and was even at the scene. What is more damnign; for the state; is I even have photos of her attempting to flee the scene of the incident being told by the alleged "victims" to hurry before the cops get there. If that isn't a brazen criminality. And if equal justice doesn't mean anything for me today or next month in my jury: someday it will. I can only hope. These are massive crimes and the incidents here are only indicators of a much broader scheme of brazen criminality, contempt and hypocrisy. July 4th I called 911 to re medical aid for a diabetic friend. I was dealing with flat tire and was in a canyon out of cell service aside from e911. Dispatchers sent off duty dispatchers who said the only way they could get her help is if we went in their pers. Veh. To their home. At the home no aid arrived, instead unwarranted tow truck did demanding cash. \$1000. I reminded driver it was unauthorized. He surrendered keys to homeowner who then said he was robbing me of my truck. Without going on more the case argues that Ryan Hell, myself, threatened the tow operator over some tow bill. Ryan was resigned for 3x fel threats. Initial appointed counsel resigns. Titus, Justin assigned. I have called emailed and texted Justin Titus and never been able to communicate with him. I've left several messages to voice mail, with at least 20 emails also sent to Justin's email which I had to locate myself at Wa State bar. I recorded one response with some preliminary discovery materials, which was the police report including witness statement. That confirmed I had a proper working email. I have faith in my innocence and I was optimistic in the fact that justice would eventually prevail and clear the name I have worked hard to clear of good conscience for several decades. I have been proactive in obtaining and maintaining contact info for the courts, and defense and I have called and gotten court dates by dialing court clerks for Chelan county. I have attempted throughout, each week to connect with council, Titus told him I had concerns about the duration of records being kept which would be exculpatory evidence critical to my case. Justin did not reply. I mentioned the concern to Mr Titus while in court at a personal appearance in Chelan Superior some time earlier. Justin assured me the recorded 911 calls would be saved and available and not destroyed. My concern, as I told Justin, was that this was a sleight of hand manipulation played by dispatchers based in the initial conversation on 911. I called for emergency medical and at no time did I volunteer or request any sort of roadside assistance for the flat tire I had as I had worked in tire stores many years and have familiarity with Wenatchee offerings having lived and run my own LLC as a field provider there doing break fix repairs for tech products throughout the state, for 7 years while attending university. The tone of court while irrelevant is that of one which is not going to take any gruff and I respect that. And I don't even expect a two way street. That's something from a guy who is being charged after tactfully defending himself and more importantly his passenger, from what appeared to be a very elaborate effort to do me and likely her grave harm. Since I am effectively denied access to council where this matter would be best suited: I will present this hear and my hopes is you can assess these claims and determine if this is a problem for this court. Again I am unable to access counsel cannot afford any and have since fallen into some sort of destruction cross hairs by judge jourdan thru. In 2016, 17; in Seattle wa the Mayor Ed Murray was being ousted for his earlier career in youth works and foster programs which problematically was overshadowed by a disgusting string of predatory events namely molesting orphans and foster children, and they had all been of African American descent. These allegations

had been reported by the children ages 4-12 and also other volunteers and workers. A substantial enough amount of this eventually occurred to warrant a state children's protective services court hearing and a sworn judge took careful inventory of the merits then decided to rule that Ed Murray was guilty of molesting those kids and he was in fact every bit pattern of child sex predator. That hearing occurred in 1984 and Ed Murray's career continued, a crime itself, and he moved to Seattle eventually becoming the mayor of the city of Seattle. Accusations came out and Murray denied them. One accuser miraculously succeeded in filing a lawsuit and there was a lot of cheering amongst many of us who had been victims in foster care and other state institutions; we cheered for justice. And perseverance, the strong will the determination and the hope for all that is good to come to light past the bad. In 2017 Delvonn Heckard that plaintiff died of a reported overdose days after the suit was filed and that was something we had a hard time with a lot of us felt like it was murder. We discussed this in depth and a times reporter said they had an anonymous tip who only said Ed Murray has a court case for molestation and it is the only proof that he was actually a molestor... and the case is sitting archives sealed or whatever and will permanently be destroyed in 4 days. They asked me for advice. I simply suggested they file a FOIA with Eugene Oregon and Oregon State Patrol records. Two days later the Murray lies went silent in Seattle mayors office and Murray quietly resigned. How does this apply to our case? In the incident, as I was waiting for the police to arrive; there were threats to my life made by the homeowners saying the police were gonna make me sorry for not paying them and they were gong to have me executed onsite. I then heard a woman frantically yelling "where is he I don't want Ryan to see me he can't see me", and some men said back "you gotta go now just go hurry up they are almost hear". The woman I ran to catch a picture of, knowing she was yet another piece of evidence and someone who should not have been where they were, was a woman named "Sally Bagshaw", a career politician and political figure of highest order, from Seattle Washington. Sally's colorful career involves being a senior da, as well as a city council woman. As I learned later, Sally was a dominant supporter of Ed Murray and she had aggressively controlled and swayed the decision of the council and fought surrender as dozens of accusers presented claims day by day leading up to his resignations. Even after the case from 1984 surfaced Sally attempted to keep Ed Murray in office. Let's look at this detail A former prosecutor. 7 years or so. Targeted women's ad coach, probably a lot of sex crimes and trafficking stuff, that sort of thing. So Sally Bagshaw was aggressively defending Ed Murray and fighting fellow councilman to keep this man who clearly had enough accusers with merit, and court records now and then let's face it; there can literally be very little portion of the entire community who is more VULNERABLE and UNDERrepresented then the African American orphans in Eugene Oregon in 1984! What a disgusting vulture both of them then and now, Ed and Sally. I'm also a bit of a satirist, I dabble with creativity and enjoy creating political cartoons to vent my frustration and debut a sense of humor. I think it is a classic way to express stimulating thought. And it's also a very historical way to get targeted by corrupt officials. Goons. Criminals. And even mafia types. So dabble lightly. And I never try to lie or manipulate although admittedly that is sort of how we express our intended message. I try to stay out of party politics. But I'm hard pressed to not see a chilling connection between some things and it's inevitable it spills out. Ed Murray however; near immediately my engagement had gotten my name tagged and harassed on social media. It was immediately clear he was being aggressively protected by professional contractors. That FASCINATED me. Why would they do that?! Who?! And what?! I'm a curious cat unfortunately so I dug. In 2017 my wife at the time was a Federal TSA Officer. While I was asleep she got up for work walking to her bus stop at Dash Point Road near Redondo Beach Wa. Decent area. Very good viability and traffic. She was robbed by a man who produced a hand gun cocking it then putting it to her head, yelling give me money. They never caught that man and a detective later smirked when talking to me saying "we won't find him, sneered and looked at me then said "I hear you guys are moving?". We moved to Philadelphia then nyc and then I returned in 23'. I've been targeted by what appear to be deep state types. And then 3rd of July this incident in Chelan county, n a desert. Canyon near Malaga. I have video and photos and Facebook post where I noted the night before while we enjoyed the view, that there were people watching us. Using optics. I could see the flickers in the distance and I had my own as well. I was seeing multiple vehicles. Both sides. Not campers. I told my passenger they were spotting visitors in the area due to wildfire risk that way if there is a fire they know who was there. We lit no fires at all. Absolutely compliant. It's yet to be told, but I surmise during the night of July 3rd of one of these spotters captured my license plate info then ran it into DAPS. Once that was done someone over in Seattle or with the right interest seen it. Then Sally Bagshaw who isn't a resident there, made the trip over to Wenatchee to meet up with these dispatchers to try to entrap me or god forbid, create some situation in order to execute me. What I do know is she isn't a resident and she is THE well established primary alpha protector of my primarily focus of vitriol which has been Ed Murray, since 2016. I didn't ask for her to come there. I never met or heard of her before. This was a total attempt to attack me, by a former SENIOR PROSECUTOR. I was a law abiding citizen engaging in travel in a place designated as appropriate for me, my passengers and my type of vehicle. I can't change who my biological parents were. But I can change the way the world looks at me as disadvantaged.
